PROFESSIONAL PROFILE

IT Support and Operations Engineer with 10+ years of experience supporting macOS and mixed-device environments, administering Google Workspace, Slack, Atlassian, and identity and access systems, and improving employee lifecycle workflows. Experienced in fast-paced startups, county government, and remote-first environments with hands-on ownership of Jamf, Intune, documentation, AV support, escalations, and Bash automation. Known for clear user support and practical improvements that reduce repeat work.

CORE CAPABILITIES

End-User Support	macOS, Windows, Mobile Devices, Executive Support, AV and Hybrid Meetings
SaaS & Identity	Google Workspace, Slack, Atlassian, Azure AD, Active Directory, Access Management
Device Lifecycle	Jamf, Intune, Endpoint Management, Onboarding, Offboarding, Policy Enforcement
Automation & AI	Bash, PowerShell, AI Project Development (Codex, Claude, Grok, Gemini), Documentation

PROFESSIONAL EXPERIENCE

IT Department Specialist

Sept 2022 - Present

County of El Dorado - Behavioral Health

- Administer enterprise systems and applications for a specialized Behavioral Health department, providing day-to-day operational support for approximately 180 employees and contracted providers.
- Own user lifecycle requests issued by HR, including account creation, modification, deactivation, permissions, and access changes across department applications.
- Serve as an application support engineer for Netsmart's Avatar, customizing user interfaces, backend forms, and workflows used for state and government reporting.
- Coordinate state- and vendor-driven application projects with internal stakeholders, outside counties, and partner agencies to keep systems current, compliant, and on schedule.
- Identify recurring support issues and turn them into documentation, new-user training, twice-monthly office hours, and workflow improvements that reduce repeated requests.
- Partner with supervisors, managers, and executives to establish priorities and project timelines while providing backup support and quality checks for Crystal Reports changes.

IT Specialist

Apr 2022 - Sept 2022

Plug and Play Tech Center

- Delivered Tier 1 through Executive IT support for the main company and served as the primary MSP-style resource for 13 separate startup companies, triaging requests through Slack, email, and Autotask/Datto in a fast-paced, remote-first environment.
- Administered Google Workspace, Slack, Atlassian, SaaS licensing, and onboarding and offboarding workflows across organizations with different access and operational requirements.
- Built Bash automation in Jamf for macOS provisioning and compliance tasks, reducing repetitive IT workload by more than 40% while improving setup consistency.
- Troubleshoot Jamf enrollment, configuration profiles, policies, and endpoint issues while maintaining access controls and security baselines across managed macOS devices.
- Supported identity and access workflows across SaaS platforms, including SSO, MFA, user provisioning, permissions, and application integration concepts.
- Coordinated hardware procurement, SaaS licensing, vendor escalations, Zoom Phone, and AV migrations to support distributed and global teams.

IT Customer Support Specialist II

Sept 2020 - Apr 2022

County of El Dorado

- Resolved more than 3,000 Tier 1 through Executive support requests during the first year across ticketing, email, phone, and onsite channels in an interrupt-driven environment.
- Helped lead the countywide migration from Google Workspace to Microsoft 365, coordinating with vendors and internal stakeholders while serving as the Jamf MDM subject matter expert.

IT CUSTOMER SUPPORT SPECIALIST II - CONTINUED

- Supported the migration of county endpoints from Jamf to Intune and administered Google Workspace, Microsoft 365, Jamf, Intune, Cisco tools, and business-critical applications.
- Supported more than 1,000 employees during the transition to remote work across Windows, macOS, iOS, and Android, including troubleshooting deployment issues across all 300 county-issued iPhones.
- Served as the primary IT contact for elected officials and executive leadership, including hands-on AV and network support for weekly hybrid public meetings.
- Provided 24/7 emergency IT coverage during wildfire response operations, supporting displaced county employees and members of the public under time-sensitive conditions.

Help Desk Technician II

Nov 2018 - Sept 2020

SBM Management Services

- Led high-priority security projects, including disk encryption and VPN deployments across domain-joined computers, while enforcing endpoint controls across desktop, mobile, and cloud environments.
- Resolved support requests across Windows, macOS, Linux, Active Directory, Exchange, MDM, file management, printers, mobile devices, and other workplace technology.
- Managed new-hire onboarding and employee offboarding while creating technical documentation and solution guides for both technical and non-technical employees.
- Supported office moves, workstation deployments, Windows imaging, and server installation in a colocation data center while administering VMware virtual machines and Cisco tools.
- Provided after-hours troubleshooting for business-critical issues and supported Cisco VoIP and VPN clients, conference room receivers, projectors, and wired and wireless screen sharing.

Supervisor

June 2017 - Nov 2018

Geek Squad

- Oversaw daily repair operations and led a team of 10 technicians to meet service KPIs and turnaround expectations.
- Assigned and prioritized diagnostic, repair, and follow-up work while resolving escalated customer and technical issues.
- Reduced repair cycle times through process coaching, technical training, and consistent performance feedback.

Advanced Repair Agent

June 2015 - June 2017

Geek Squad

- Served as the Geek Squad precinct's ChromeOS subject matter expert while diagnosing and repairing complex Windows, macOS, and ChromeOS hardware and software issues.
- Managed multiple repairs simultaneously, maintained detailed service documentation, and completed work within established turnaround expectations.
- Partnered with customer-facing agents to communicate diagnostic findings, recommend solutions, and resolve escalated technical issues.

TECHNICAL PROJECTS

Jamf Workflow Automation

Operational automation for macOS provisioning and compliance.

- Built Bash scripts in Jamf to automate device setup and compliance tasks.
- Reduced repetitive IT work by more than 40% and improved consistency across macOS workflows.

SIEM Home Lab | github.com/nicktperez/siem-home-lab

Centralized endpoint telemetry and detection validation using the Elastic Stack.

- Built the lab with Elasticsearch, Logstash, Kibana, Winlogbeat, Sysmon, and Windows Event Forwarding.
- Developed dashboards and simulated attacks to validate detection logic for authentication, privilege, and persistence activity.

Raspberry Pi Honeypot

Internet-facing Cowrie environment for analyzing real-world SSH and Telnet activity.

- Captured more than 1,000 unauthorized login attempts within the first week.
- Forwarded Cowrie activity into Elastic Stack and built dashboards to track attack sources, attempted credentials, and session behavior.

EDUCATION & CERTIFICATIONS

Associate of Science in Computer Science - Cosumnes River College

Certificates Web Publishing, Web Programming | CompTIA Security+ in progress (Expected 2026)

Current Course Harvard CS50's Introduction to Programming with Python (In Progress)
